## Personal Statement

Experienced Mid level Front-end Engineer proficient in React, TypeScript, Angular, Vite and NextJS, with certifications in AWS, Google Cloud and UX Design. Strong skills in development architectures and experience in large projects. Passionate about learning and constantly seeking improvement. Developer since 2022.

---

## Experience

Software Engineer at Bix Tech - October 2024 - present

Remote - Coral Gables, Flórida, United States

I develop modern, scalable applications focusing on React.js, Next.js, Vite, JavaScript, and TypeScript. My responsibilities include building performant and accessible interfaces, integrating systems with Node.js in Docker environments, applying software engineering principles (SOLID, Clean Code, DDD, and Design Patterns), managing version control with Git, participating in agile methodologies (Scrum and Kanban), leading technical discussions with national and international stakeholders, and sharing knowledge with the team. I'm passionate about solving complex problems and delivering efficient, innovative solutions using modern technologies.

Front End Engineer at Germinare Agro - April 2023 - October 2024

Remote - Uberlândia, MG Brasil

Working with React, Angular, TypeScript, AWS, Python, and REST API, I have been responsible for the Front End, as well as performing UI and UX design functions with Figma. I highlight the development of the Sales Trackr application, a self-initiative that effectively replaced spreadsheets used for commodity sales analysis, becoming a crucial project in the company due to its significant impact on time reduction. I am responsible for 2 major projects focusing on the national and international commodities market, also using Python and REST API.

Front End Developer at DG Sys - November 2022 - April 2023

Remote - Indaial, SC Brasil

Development of applications with Angular, TypeScript, Node.js, and AWS Lambda. Active participation in large projects with user support, maintenance, and creation of new features. Due to the criticality of customer data, I enhanced my skills in security and data manipulation using Firebase and AWS.

Full Stack Developer Freelancer at Braintrust - July 2022 - April 2023

Remote - Brazil

Providing development services for both front-end/design and back-end development. Using TypeScript, Angular, C#, AWS, Node.js, and Firebase. Also conducting designs with Figma focused on UX and UI.

---

## Education

SENAI

Back End Development - (2022 - 2023)

SENAI

Front End Development - (2021 - 2022)

FIAP
